

ADIKAVI NANNAYA UNIVERSITY:: RAJAHMAHENDRAVARAM
B.Sc Statistics Syllabus (w.e.f:2020-21 A.Y)

UG PROGRAM (4 Years Honors)
CBCS - 2020-21

B. Sc
STATISTICS

Syllabus and Model Question Papers

1. RESOLUTIONS OF THE BOARD OF STUDIES

Meeting held on: 22.01.2021.Time:10 A.MAt: Adikavi Nannaya University , RJY

Agenda:

1. Adoption of revised-common program structure and revising/updating course-wisesyllabi(in the prescribed format) as per the guidelines issued by APSCHE.
2. Adoption of regulations on scheme of examination and marks/grading system of the University UG programs.
3. Preparation of Model question papers in prescribed format.
4. List of equipment/software requirement for each lab/practical
5. Eligibility of student for joining the course
6. Eligibility of faculty for teaching the course
7. List of paper-setters/paper evaluators with phone, email-id in the prescribed format

Minutes of the Meeting and Resolutions:

Outcome based UG Programmes (Non-Professional/ Conventional) with effect from 2020-2021 academic year under CBCS for implementing in all affiliated colleges of AKNU.

The U.G Board of Studies of STATISTICS was held on 21-01-2021 at 10 A.M at AKNU Conference Hall, Rajamahendravaram. The chair-Person/ Convenor and members have discussed and framed the syllabus for B.Sc/B.A (With mathematical combination) C.B.C.S Pattern for I, II, III, IV & V Semesters with effect from the academic year 2020-2021 and discussed the following Agends.

1. Framing the model question Papers for the Prescribed Syllabus for setting the model questionpapers.
2. Framing the model question papers for the Prescribed Syllabus & Scheme for setting the modelquestion papers.
3. List of Practicals with scheme
4. List of text books for the Prescribed Syllabus.
5. List of Paper Setters and Evaluators to follow the specific instructions.
6. List of Equipment/Software requirement for each lab/Practical.
7. Eligibility of Student for Joining the Course.
8. Eligibility of faculty for teaching the course.

Members Present

1. Dr. D.V. Ramana Murthy Signature of the Chair Person/Convener
Dr. D.V.Ramana Murthy
S.K.V.T. College RAJAMAHENDRAVARAM

2. Dr. N.Madhavi
Lecturer in Statistics
Govt College(A),
Rajahmundry
East Godavari Dt (AP)

3. K. Narayana Raju
B.V.Raju College
Bhimavaram
West Godavari Dt(AP)

4. G. Satish Kumar
V.S. Laksmi College (Womens)
Kakinada E.G.Dt

5. Sri G. Moses S.G. Lecturer
D.N.R. College Bhimavaram W.G.Dt

6. Mr. K. Ashok
Lecturer in Statistics
P.R.Govt Colege (A)
Kakinada
E.G.DT

DETAILS OF COURSE TITLES & CREDITS

Sem	Course no.	Course Name	Course type (T/L/P)	Hrs./Week (Science: 4+2)	Credits (Science: 4+1)	Max. Marks Cont/ Internal/Mid Assessment	Max. Marks Sem-end Exam

Program objectives, outcomes, co-curricular and assessment methods

B Sc	STATISTICS
-------------	-------------------

Objective of the Course:

Statistics is a key to success in the field of science and technology. Today, the students need a thorough knowledge of fundamental basic principles, methods, results and a clear perception of the power of statistical ideas and tools to use them effectively in modeling, interpreting and solving the real life problems. Statistics plays an important role in the context of globalization of Indian economy, modern technology, computer science and information technology.

The main objectives of the course are

- To build the basis for promoting theoretical and application aspects of statistics.
- To underline the statistics as a science of decision making in the real life problems with the description of uncertainty.
- To emphasize the relevance of statistical tools and techniques of analysis in the study of inter-disciplinary sciences.
- To acquaint students with various statistical methods and their applications in different fields.
- To cultivate statistical thinking among students.
- To develop skills in handling complex problems in data analysis and research design.
- To prepare students for future courses having quantitative components.

This course is aimed at preparing the students to hope with the latest developments and compete with students from other universities and put them on the right track.

Paper Wise Objectives

PAPER-I: Descriptive Statistics

- The objective of this paper is to throw light on the role of statistics in different fields with special reference to business and economics.
- It gives the students to review good practice in presentation and the format most applicable to their own data.
- The measures of central tendency or averages reduce the data to a single value which is highly useful for making comparative studies.
- The measures of dispersion throw light on reliability of average and control of variability
- The concept of Correlation and Linear Regression deals with studying the linear relationship between two or more variables, which is needed to analyze the real life problems.
- The attributes gives an idea that how to deal with qualitative data.

PAPER-II: Probability Theory and Distributions

- This paper deals with the situation where there is uncertainty and how to measure that uncertainty by defining the probability, random variable and mathematical expectation which are essential in all research areas.
- This paper gives an idea of using various standard theoretical distributions, their chief characteristics and applications in analyzing any data.

PAPER-III: Statistical Inference

- This paper deals with standard sampling distributions like Chi Square, t and F and their characteristics and applications.
- This paper deals with the different techniques of point estimation for estimating the parameter values of population and interval estimation for population parameters.
- In this paper, various topics of Inferential Statistics such as interval estimation, Testing of Hypothesis, large sample tests (Z-test), small sample tests (t-test, F-test, chi-square test) and non-parametric tests are dealt with. These techniques play an important role in many fields like pharmaceutical, agricultural, medical etc.

PAPER-IV: Sampling Techniques and Design of Experiments

- The sampling techniques deals with the ways and methods that should be used to draw samples to obtain the optimum results, i.e., the maximum information about the characteristics of the population with the available sources at our disposal in terms of time, money and manpower to obtain the best possible estimates of the population parameters
- This paper throw light on understanding the variability between group and within group through Analysis of Variance
- This gives an idea of logical construction of Experimental Design and applications of these designs now days in various research areas.
- Factorial designs allow researchers to look at how multiple factors affect a dependent variable, both independently and together.

PAPER-V: Applied Statistics

- This paper deals the time series on simple description methods of data, explains the variation, forecasting the future values, control procedures.
- It gives an idea of using index numbers in a range of practical situations, limitations and uses
- The vital statistics enlighten the students in obtaining different mortality, fertility rates thus obtaining the population growth rates and construction and use of life tables in actuarial science.

ADIKAVI NANNAYA UNIVERSITY:: RAJAHMAHENDRAVARAM
B.Sc Statistics Syllabus (w.e.f:2020-21 A.Y)

B. Sc	Semester: I	Credits: 4
Course: 1	Descriptive Statistics	Hrs/Wk: 4

Course Learning Outcomes:

Students will acquire:

- knowledge of Statistics and its scope and importance in various areas such as Medical, Engineering, Agricultural and Social Sciences etc.
- knowledge of various types of data, their organization and evaluation of summary measures such as measures of central tendency and dispersion etc.
- knowledge of other types of data reflecting quality characteristics including concepts of independence and association between two attributes,
- insights into preliminary exploration of different types of data.
- Knowledge of correlation, regression analysis, regression diagnostics, partial and multiple correlations.

UNIT I:

Introduction to Statistics: Importance of Statistics. Scope of Statistics in different fields. Concepts of primary and secondary data. Diagrammatic and graphical representation of data: Histogram, frequency polygon, Ogives, Pie. Measures of Central Tendency: Mean, Median, Mode, Geometric Mean and Harmonic Mean. Median and Mode through graph.

UNIT II:

Measures of Dispersion: Range, Quartile Deviation, Mean Deviation and Standard Deviation, Variance. Central and Non-Central moments and their interrelationship. Sheppard's correction for moments. Skewness and kurtosis.

UNIT III:

Curve fitting: Bi- variate data, Principle of least squares, fitting of degree polynomial. Fitting of straight line, Fitting of Second degree polynomial or parabola, Fitting of power curve and exponential curves.

Correlation: Meaning, Types of Correlation, Measures of Correlation: Scatter diagram, Karl Pearson's Coefficient of Correlation, Rank Correlation Coefficient (with and without ties), Bi-variate frequency distribution, correlation coefficient for bi-variate data and simple problems. Concept of multiple and partial correlation coefficients (three variables only) and properties

UNIT IV:

Regression : Concept of Regression, Linear Regression: Regression lines, Regression coefficients and it's properties, Regressions lines for bi-variate data and simple problems. Correlation vs regression.

UNIT-V

Attributes : Notations, Class, Order of class frequencies, Ultimate class frequencies, Consistency of data, Conditions for consistency of data for 2 and 3 attributes only , Independence of attributes , Association of attributes and its measures, Relationship between association and colligation of attributes, Contingencytable: Square contingency, Mean square contingency, Coefficient of mean square contingency, Tschuprow's coefficient of contingency.

ADIKAVI NANNAYA UNIVERSITY:: RAJAHMAHENDRAVARAM
B.Sc Statistics Syllabus (w.e.f:2020-21 A.Y)

TEXT BOOKS:

1. V.K.Kapoor and S.C.Gupta: Fundamentals of Mathematical Statistics, Sultan Chand & Sons, New Delhi.
2. BA/BSc I year statistics - descriptive statistics, probability distribution - Telugu Academy - Dr M.Jaganmohan Rao, Dr N.Srinivasa Rao, Dr P.Tirupathi Rao, Smt.D.Vijayalakshmi.
3. K.V.S. Sarma: Statistics Made Simple: Do it yourself on PC. PHI

REFERENCE BOOKS:

1. Willam Feller: Introduction to Probability theory and its applications. Volume –I, Wiley
2. Goon AM, Gupta MK, Das Gupta B : Fundamentals of Statistics , Vol-I, the World Press Pvt.Ltd.,Kolakota.
3. Hoel P.G: Introduction to mathematical statistics, Asia Publishinghouse.
4. M. JaganMohan Rao and Papa Rao: A Text book of Statistics Paper-I.
5. Sanjay Arora and Bansi Lal: New Mathematical Statistics: Satya Prakashan , New Delhi

ADIKAVI NANNAYA UNIVERSITY:: RAJAHMAHENDRAVARAM
B.Sc Statistics Syllabus (w.e.f:2020-21 A.Y)

B. Sc	Semester: I	Credits: 1
Course: 1(L)	Practical	Hrs/Wk: 2

List of the experiments:

1. Graphical presentation of data (Histogram, frequency polygon, Ogives).
2. Diagrammatic presentation of data (Bar and Pie).
3. Computation of measures of central tendency (Mean, Median and Mode)
4. Computation of measures of dispersion (Q.D, M.D and S.D)
5. Computation of non-central, central moments, β_1 and β_2 for ungrouped data.
6. Computation of non-central, central moments, β_1 and β_2 and Sheppard's corrections for grouped data.
7. Computation of Karl Pearson's coefficients of Skewness and Bowley's coefficients of Skewness.
8. Fitting of straight line by the method of least squares
9. Fitting of parabola by the method of least squares
10. Fitting of power curve of the type by the method of least squares.
11. Fitting of exponential curve of the type and by the method of least squares.
12. Computation of correlation coefficient and regression lines for ungrouped data
13. Computation of correlation coefficient, forming regression lines for grouped data
14. Computation of Yule's coefficient of association
15. Computation of Pearson's, Tcherprows coefficient of contingency

Note: Training shall be on establishing formulae in Excel cells and derive the results. The excel output shall be exported to MS word for writing inference.

MODEL QUESTION PAPER (Semester End)

UG DEGREE EXAMINATIONS

SEMESTER -I

Course: DESCRIPTIVE STATISTICS

Time: 3 Hrs.

Max Marks: 75

SECTION-A

Answer any five questions. All questions carry equal marks.

5 x 5= 25M

1. Distinguish between questionnaire and schedule.
2. Write short note on Diagrams and its types?
3. Explain Standard Deviation with its merits and demerits
4. In a frequency distribution, the co-efficient of skewness based upon the quartiles is 0.6. If the sum of the upper and lower quartiles is 100 and median is 38, find the value of the upper and lower quartiles.
5. Explain Method of Least squares
6. Explain Association of attributes
7. Explain concept of Skewness
8. Correlation vs Regression

SECTION-B

Answer ALL the questions. All questions carry equal marks. 5 x 10 = 50M

9. a) What do you understand by collection of data? What are its objectives? Discuss different methods
 (OR)
 b) Describe the different measures of central tendency and discuss their Merits and demerits.
10. a) Explain the methods of measuring skewness and kurtosis of a frequency Distribution.
 (OR)
 b) Define the raw and central moments of a frequency distribution. Derive the Relationship between them.
11. a) Explain Karl Pearson's coefficient of Correlation
 (OR)
 b) Fit a Second Degree Equation to the following data

X	2	4	6	8	10	12
y	10	14	19	25	31	36

12. a) Explain Karl Pearson's coefficient of Correlation
 (OR)
 b) Explain Regression X on Y and Y on C with its Properties
13. a) The Rank of 15 students in Mathematics and Statistics are given below. Obtain rank correlation coefficient between them

Rank of Maths	1	2	6	9	11	15	10	8	4	7	5	14	13	12	3
Rank of Statistics	10	7	8	11	9	13	15	1	6	3	4	12	14	5	2

- (OR)
 b) Explain Consistency of data for Single ,double and triple attributes

B. Sc	Semester: II	Credits: 4
Course: 2	PROBABILITY AND PROBABILITY DISTRIBUTIONS	Hrs/Wk: 4

Course Learning Outcomes:

Students will acquire:

- ability to distinguish between random and non-random experiments,
- knowledge to conceptualize the probabilities of events including frequentist and axiomatic approach. Simultaneously, they will learn the notion of conditional probability including the concept of Bayes' Theorem,
- knowledge related to concept of discrete and continuous random variables and their probability distributions including expectation and moments,
- knowledge of important discrete and continuous distributions such as Binomial, Poisson, Geometric, Negative Binomial and Hyper-geometric, normal, uniform, exponential, beta and gamma distributions,
- acumen to apply standard discrete and continuous probability distributions to different situations.

UNIT I:

Introduction to Probability: Basic Concepts of Probability, random experiments, trial, outcome, sample space, event, mutually exclusive and exhaustive events, equally likely and favourable outcomes. Mathematical, Statistical, axiomatic definitions of probability. Conditional Probability and independence of events, Addition and multiplication theorems of probability for 2 and for n events. Boole's inequality and Baye's theorem and its applications in real life problems.

UNIT II:

Random variable: Definition of random variable, discrete and continuous random variables, functions of random variable. Probability mass function. Probability density function, Distribution function and its properties. For given pmf, pdf calculation of moments, coefficient of skewness and kurtosis. Bivariate random variable - meaning, joint, marginal and conditional Distributions, independence of random variables and simple problems.

UNIT III:

Mathematical expectation : Mathematical expectation of a random variable and function of a random variable. Moments and covariance using mathematical expectation with examples. Addition and Multiplication theorems on expectation. Definitions of M.G.F, C.G.F, P.G.F, C.F and their properties. Chebyshev and Cauchy - Schwartz inequalities.

UNIT IV:

Discrete Distributions: Binomial, Poisson, Negative Binomial, Geometric distributions: Definitions, means, variances, M.G.F, C.F, C.G.F, P.G.F, additive property if exists. Poisson approximation to Binomial distribution. Hyper-geometric distribution: Definition, mean and variance.

UNIT V:

Continuous Distributions: Rectangular, Exponential, Gamma, Beta Distributions: mean , variance, M.G.F, C.G.F, C.F. Normal Distribution: Definition, Importance, Properties, M.G.F, CF, additive property.

TEXT BOOKS:

1. V.K.Kapoor and S.C.Gupta: Fundamentals of Mathematical Statistics, Sultan Chand & Sons, New Delhi.
2. BA/BSc I year statistics - descriptive statistics, probability distribution - Telugu Academy - Dr M.Jaganmohan Rao, Dr N.Srinivasa Rao, Dr P.Tirupathi Rao, Smt.D.Vijayalakshmi.
3. K.V.S. Sarma: Statistics Made Simple: Do it yourself on PC. PHI

REFERENCE BOOKS:

1. Willam Feller: Introduction to Probability theory and its applications. Volume –I, Wiley
2. Goon AM, Gupta MK, Das Gupta B : Fundamentals of Statistics , Vol-I, the World Press Pvt.Ltd., Kolakota.
3. Hoel P.G: Introduction to mathematical statistics, Asia Publishinghouse.
4. M. JaganMohan Rao and Papa Rao: A Text book of Statistics Paper-I.
5. Sanjay Arora and Bansilal: New Mathematical Statistics: Satya Prakashan , New Delhi
6. Hogg Tanis Rao: Probability and Statistical Inference. 7th edition. Pearson.

B. Sc	Semester: II	Credits: 1
Course: 2(L)	Practical	Hrs/Wk: 2

List of Experiments:

1. Fitting of Binomial distribution – Directmethod.
2. Fitting of binomial distribution – Recurrence relationMethod.
3. Fitting of Poisson distribution – Directmethod.
4. Fitting of Poisson distribution - Recurrence relationMethod.
5. Fitting of Negative Binomialdistribution.
6. Fitting of Geometricdistribution.
7. Fitting of Normal distribution – Areasmethod.
8. Fitting of Normal distribution – Ordinatesmethod.
9. Fitting of Exponentialdistribution.

Note: Training shall be on establishing formulae in Excel cells and derive the results. The exceloutput shall be exported to MS word for writing inference.

MODEL QUESTION PAPER (Semester End)

UG DEGREE EXAMINATIONS

SEMESTER -II

Course: PROBABILITY AND PROBABILITY

Time: 3 Hrs.

Max Marks: 75

SECTION-A

Answer any five questions. All questions carry equal marks.

5 x 5= 25M

1. Write short note on Probability
2. Explain Booles Inequality
3. Define (i) Mutually Exclusive events
(ii) Exhaustive events
(iii) Equally likely events
4. Explain Bivariate random variable
5. Define Uniform Distribution and its properties
6. Give the applications of Normal distribution
7. Explain Cauchy - Schwartz inequalities
8. Define Exponential distribution with its properties

SECTION-A

Answer ALL the questions. All questions carry equal marks.

5 x 10 = 50M

9. a) Explain Types of Probability and Explain properties of Probability
(OR)
b) Define Conditional Probability and Explain Bayes theorem with its applications
10. a) Explain types of Random Variables and Explain p.m.f and p.d.f with its properties
(OR)
b) A random variable X has the following probability function

X = x	0	1	2	3	4	5	6	7
P(X=x)	0	K	2k	2k	3k	K ²	2k ²	7k ² +k

- a) Find K, P (X < 6), P (X ≥ 6), P (0 < X < 5). b) Find Distribution function. c)Its graph.
11. a) Prove the following results
(i)E (X + Y) = E (X) + E (Y), (ii) E (XY) = E(X) E(Y)
(OR)
b) Explain MGF and CGF with its properties
12. a) Write about Binomial distribution and its properties
(OR)
b)Write about Poisson distribution and its properties
13. a) Define Normal distribution. Mention its properties
(OR)
b)Write short note on Beta and Gamma Distribution

ADIKAVI NANNAYA UNIVERSITY:: RAJAHMAHENDRAVARAM
B.Sc Statistics Syllabus (w.e.f:2020-21 A.Y)

B. Sc	Semester: III	Credits: 4
Course: 3	STATISTICAL INFERENCE	Hrs/Wk: 4

Course Learning Outcomes:

The students will acquire

- Concept of law large numbers and their uses
- Concept of central limit theorem and its uses in statistics
- concept of random sample from a distribution, sampling distribution of a statistic, standarderror of important estimates such as mean and proportions,
- knowledge about important inferential aspects such as point estimation, test of hypothesesand associated concepts,
- knowledge about inferences from Binomial, Poisson and Normal distributions as illustrations,
- concept about non-parametric method and some important non-parametric tests.

UNIT I:

Concepts: Population, Sample, Parameter, statistic, Sampling distribution, Standard error. convergence in probability and convergence in distribution, law of large numbers, central limit theorem (statements only). Student's t- distribution, F – Distribution, χ^2 -Distribution: Definitions, properties and their applications.

UNIT II:

Theory of estimation: Estimation of a parameter, criteria of a good estimator – unbiasedness, consistency, efficiency, & sufficiency and. Statement of Neyman's factorization theorem. Estimation of parameters by the method of moments and maximum likelihood (M.L), properties of MLE's. Binomial, Poisson & Normal Population parameters estimate by MLE method. Confidence Intervals.

UNIT III:

Testing of Hypothesis: Concepts of statistical hypotheses, null and alternative hypothesis, critical region, two types of errors, level of significance and power of a test. One and two tailed tests. Neyman- Pearson's lemma. Examples in case of Binomial, Poisson, Exponential and Normal distributions.

UNIT IV:

Large sample Tests: large sample test for single mean and difference of two means, confidence intervals for mean(s). Large sample test for single proportion, difference of proportions. standard deviation(s) and correlation coefficient(s).

Small Sample tests: t-test for single mean, difference of means and paired t-test. χ^2 -test for goodness of fit and independence of attributes. F-test for equality of variances.

UNIT V:

Non-parametric tests- their advantages and disadvantages, comparison with parametric tests. Measurement scale- nominal, ordinal, interval and ratio. One sample runs test, sign test and Wilcoxon- signed rank tests (single and paired samples). Two independent sample tests: Median test, Wilcoxon – Mann-Whitney U test, Wald Wolfowitz's runs test.

TEXT BOOKS:

1. BA/BSc II year statistics - statistical methods and inference - Telugu Academy by A.Mohanrao, N.Srinivasa Rao, Dr R.Sudhakar Reddy, Dr T.C. RavichandraKumar.
2. K.V.S. Sarma: Statistics Made Simple: Do it yourself on PC.PHI.

ADIKAVI NANNAYA UNIVERSITY:: RAJAHMAHENDRAVARAM
B.Sc Statistics Syllabus (w.e.f:2020-21 A.Y)

REFERENCE BOOKS:

1. Fundamentals of Mathematics statistics : VK Kapoor and SCGuptha.
2. Outlines of statistics, Vol II : Goon Guptha, M.K.Guptha, Das GupthaB.
3. Introduction to Mathematical Statistics : HoelP.G.
4. Hogg Tanis Rao: Probability and Statistical Inference. 7th edition.Pearson.

ADIKAVI NANNAYA UNIVERSITY:: RAJAHMAHENDRAVARAM
B.Sc Statistics Syllabus (w.e.f:2020-21 A.Y)

B. Sc	Semester: III	Credits: 1
Course: 3(L)	Practical	Hrs/Wk: 2

List of Experiments:

1. Large sample test for difference of means
2. Large sample test for single proportion
3. Large sample test for difference of proportions
4. Large sample test for difference of standard deviations
5. Large sample test for correlation coefficient
6. Small sample test for single mean
7. Small sample test for difference of means
8. Small sample test for correlation coefficient
9. Paired t-test (paired samples).
10. Small sample test for single variance (χ^2 - test)
11. Small sample test for difference of variances (F-test)
12. χ^2 - test for goodness of fit and independence of attributes
13. Nonparametric tests for single sample (run test, sign test and Wilcoxon signed rank test)
14. Nonparametric tests for related samples (sign test and Wilcoxon signed rank test)
15. Nonparametric tests for two independent samples (Median test, Wilcoxon –Mann-Whitney - U test, Wald - Wolfowitz' s run test)

Note: Training shall be on establishing formulae in Excel cells and deriving the results. The excel output shall be exported to MS Word for writing inferences.

MODEL QUESTION PAPER (Semester End)

UG DEGREE EXAMINATIONS

SEMESTER -III

Course: STATISTICAL INFERENCE

Time: 3 Hrs.

Max Marks: 75

SECTION-A

Answer any five questions. All questions carry equal marks.

5 x 5M= 25M

1. What is MLE and write its properties
2. Explain Confidence Intervals.
3. Explain Null hypothesis and Alternative hypothesis.
4. Explain the difference between Parametric tests, Non-parametric tests
5. Explain paired t- test.
6. Explain chi-square test for independence of attributes.
7. Write the assumptions of non parametric tests
8. Explain testing procedure for hypothesis in large sample case

SECTION-B

Answer ALL the questions. All questions carry equal marks. 5 x 10M = 50M

9. a) Explain about chi-square distribution and its properties
(OR)
b) Explain about f-distribution and its properties.
10. a) Explain the criteria of a good estimator.
(OR)
b) Explain different Methods of Estimation
11. a) State and prove Neyman-Pearson's Lemma.
(OR)
b) How do you apply Neyman's Pearson's lemma in case of Binomial distribution?
12. a) Explain the test procedure for (i) Testing of Mean and (ii) Equality of two means
(OR)
b) The following data obtained from a survey conducted about 320 families who are having five children. Fit a Binomial distribution for the data with $p = \frac{1}{2}$ and test the goodness of fit.

No. of boys	0	1	2	3	4	5
No. of families	14	56	110	88	40	12

13. a) Explain the test procedure for Median test
(OR)
b) What are non-parametric tests and explain difference between parametric, non-parametric tests

B. Sc	Semester: IV	Credits: 4
Course: 4	SAMPLING TECHNIQUES AND DESIGN OF EXPERIMENTS	Hrs/Wk: 4

Course Learning Outcomes

The students shall get

- Introduced to various statistical sampling schemes such as simple, stratified and systematic sampling.
- an idea of conducting the sample surveys and selecting appropriate sampling techniques,
- Knowledge about comparing various sampling techniques.
- carry out one way and two way Analysis of Variance,
- understand the basic terms used in design of experiments,
- use appropriate experimental designs to analyze the experimental data.

UNIT I:

Simple Random Sampling (with and without replacement): Notations and terminology, various probabilities of selection. Random numbers tables and its uses. Methods of selecting simple random sample, lottery method, method based on random numbers. Estimates of population total, mean and their variances and standard errors, determination of sample size, simple random sampling of attributes.

UNIT II:

Stratified random sampling: Stratified random sampling, Advantages and Disadvantages of Stratified Random sampling, Estimation of population mean, and its variance. Stratified random sampling with proportional and optimum allocations. Comparison between proportional and optimum allocations with SRSWOR.

Systematic sampling: Systematic sampling definition when $N = nk$ and merits and demerits of systematic sampling - estimate of mean and its variance. Comparison of systematic sampling with Stratified and SRSWOR.

UNIT III:

Analysis of variance : Analysis of variance(ANOVA) –Definition and assumptions. One-way with equal and unequal classification, Two way classification.

Design of Experiments: Definition, Principles of design of experiments, CRD: Layout, advantages and disadvantage and Statistical analysis of Completely Randomized Design(C.R.D).

UNIT IV:

Randomized Block Design (R.B.D) and Latin Square Design (L.S.D) with their layouts and Analysis, Missing plot technique in RBD and LSD. Efficiency of RBD over CRD, Efficiency of LSD over RBD and CRD.

UNIT V:

Factorial experiments – Main effects and interaction effects of 2^2 and 2^3 factorial experiments and their Statistical analysis. Yates procedure to find factorial effect totals.

TEXT BOOKS:

1. Telugu Academy BA/BSc III year paper - III Statistics - applied statistics - Telugu academy by Prof.K.Srinivasa Rao, Dr D.Giri. Dr A.Anand, Dr V.Papaiah Sastry.
2. K.V.S. Sarma: Statistics Made Simple: Do it yourself on PC.PHI.

REFERENCE BOOKS:

1. Fundamentals of applied statistics : VK Kapoor and SC Gupta.
2. Indian Official statistics - MR Saluja.
3. Anuvarthita Sankyaka Sastram - Telugu Academy.

B. Sc	Semester: IV	Credits: 1
Course: 4(L)	Practical	Hrs/Wk: 2

List of Experiments:

Sampling Techniques:

Estimation of population mean and its variance by

1. Simple random sampling with and without replacement. Comparison between SRSWR and SRSWOR.
2. Stratified random sampling with proportional and optimum allocations. Comparison between proportional and optimum allocations with SRSWOR.
3. Systematic sampling with $N=nk$. Comparison of systematic sampling with Stratified and SRSWOR.

Design of Experiments:

4. ANOVA - one - way classification with equal and unequal number of observations
5. ANOVA Two-way classification with equal number of observations.
6. Analysis of CRD.
7. Analysis of RBD Comparison of relative efficiency of CRD with RBD
8. Estimation of single missing observation in RBD and its analysis
9. Analysis of LSD and efficiency of LSD over CRD and RBD
10. Estimation of single missing observation in LSD and its analysis
11. Analysis of 2^2 with RBD layout
12. Analysis of 2^3 with RBD layout

Note: Training shall be on establishing formulae in Excel cells and deriving the results. The excel output shall be exported to MS Word for writing inferences.

SECTION-B

Answer any five questions. All questions carry equal marks.

5 x 5= 25M

1. Distinguish between census survey and sample surveys.
2. Differences between SRSWR and SRSWOR.
3. Explain the purpose of ANOVA.
4. Explain about CRD
5. What are different types of sampling
6. Explain types of allocation in stratified sampling.
7. Explain about Yates procedure to find factorial effectotals
8. Explain about methods of drawing random samples from Simple random Sampling

SECTION-B

Answer ALL the questions. All questions carry equal marks.

5 x 10 = 50M

9. a) What are principal steps in a sample survey.
(OR)
b) Discuss Sampling and non-sampling errors.
10. a) Derive the variance of the sample mean in SRSWOR.
(OR)
b) If the population consists of linear trend, then prove that $V(Y_{st}) \leq V(Y_{sys}) \leq V(Y_n)_R$
11. b) Discuss about basic principles of experimentation
(OR)
b) Explain Two way ANOVA Classification
12. a) Explain LSD and merits, demerits of LSD
(OR)
b) Explain the analysis of RBD with one missing observation.
13. a) Explain about Main effects and interaction effects of 2^2
(OR)
b) Main effects and interaction effects of 2^3 factorial experiments

B. Sc	Semester: IV	Credits: 4
Course: 5	APPLIED STATISTICS	Hrs/Wk: 4

Course Learning Outcomes

After completion of this course, the students will know about

- Time series data, its applications to various fields and components of time series,
- Fitting and plotting of various growth curves such as modified exponential, Gompertz and logistic curve, Fitting of trend by Moving Average method,
- Measurement of Seasonal Indices by Ratio-to-Trend , Ratio-to-Moving Average and Link Relative methods,
- Applications to real data by means of laboratory assignments.
- Interpret and use a range of index numbers commonly used in the business sector
- Perform calculations involving simple and weighted index numbers
- Understand the basic structure of the consumer price index and perform calculations involving its use
- Various data collection methods enabling to have a better insight in policy making, planning and systematic implementation, Construction and implementation of life tables, Population growth curves, population estimates and projections,
- Real data implementation of various demographic concepts as outlined above through practical assignments.

UNIT I:

Time Series: Time Series and its components with illustrations, additive, multiplicative models. Trend: Estimation of trend by free hand curve method, method of semi averages. Determination of trend by least squares (Linear trend, parabolic trend only), moving averages method.

UNIT II:

Seasonal Component: Determination of seasonal indices by simple averages method, ratio to moving average, Ratio to trend and Link relative methods, Depersonalization.

UNIT III:

Growth curves: Modified exponential curve, Logistic curve and Gompertz curve, fitting of growth curves by the method of three selected points and partial sums. Detrending. Effect of elimination of trend on other components of the time series

UNIT IV:

Index numbers: Concept, construction, problems involved in the construction of index numbers, uses and limitations. Simple and weighted index numbers. Laspeyres's, Paasche's and Fisher's index numbers, Criterion of a good index number, Fisher's ideal index numbers. Cost of living index number and wholesale price index number.

UNIT V:

Vital Statistics: Introduction, definition and uses of vital statistics, sources of vital statistics. Measures of different Mortality and Fertility rates, Measurement of population growth. Life tables: construction and uses of life tables.

TEXT BOOKS:

1. Fundamentals of applied statistics : VK Kapoor and SCGupta.
2. BA/BSc III year paper - III Statistics - applied statistics - Telugu academy by prof.K.Srinivasa Rao, Dr D.Giri. Dr A.Anand, Dr V.PapaiahSastry.

REFERENCE BOOKS:

1. Anuvarthita Sankyaka Sastram - TeluguAcademy.
2. Mukopadhyay, P (2011). Applied Statistics, 2nd ed. Revised reprint, Books and Allied Pvt. Ltd.
3. Brockwell, P.J. and Devis, R.A. (2003). Introduction to Time Series Analysis. Springer.
4. Chatfield, C. (2001). Time Series Forecasting., Chapman & Hall.
5. Srinivasan, K. (1998). Demographic Techniques and Applications. Sage Publications
6. Srivastava O.S. (1983). A Text Book of Demography. Vikas Publishing House

ADIKAVI NANNAYA UNIVERSITY:: RAJAHMAHENDRAVARAM
B.Sc Statistics Syllabus (w.e.f:2020-21 A.Y)

B. Sc	Semester: IV	Credits: 1
Course: 5(L)	Practical	Hrs/Wk: 2

List of Experiments:

Time Series:

1. Measurement of trend by method of moving averages(odd and evenperiod)
2. Measurement of trend by method of Least squares(linear andparabola)
3. Determination of seasonal indices by method simpleaverages
4. Determination of seasonal indices by method of Ratio to movingaverages
5. Determination of seasonal indices by method of Ratio totrend
6. Determination of seasonal indices by method of Linkrelatives

Index Numbers:

7. Computation of simple indexnumbers.
8. Computation of all weighted index numbers.
9. Computation of reversaltests.

Vital Statistics:

10. Computation of various Mortalityrates
11. Computation of various Fertilityrates
12. Computation of various Reproductionrates.
13. Construction of LifeTables

Note: Training shall be on establishing formulae in Excel cells and deriving the results. The excel outputshall be exported to MS Word for writing inferences.

MODEL QUESTION PAPER (Semester End)

UG DEGREE EXAMINATIONS

SEMESTER -IV

Course: APPLIED STATISTICS

Time: 3 Hrs.

Max Marks: 75

SECTION-A

Answer any five questions. All questions carry equal marks.

5 x 5= 25M

1. Explain the method of Simple averages
2. Explain Cost of living Index numbers
3. Explain Graphical Method
4. What are the sources of vital statistics
5. Explain the use of index numbers
6. Explain Gross reproduction rate and Net reproduction rate.
7. Explain Method of least squares in time series.
8. Explain about logistic curve

SECTION-B

Answer ALL the questions. All questions carry equal marks. 5 x 10 = 50M

9. a) Explain the components of Time series
(OR)
b) Explain methods of trend
10. a) Explain the problems involved in the construction of index numbers
(OR)
b) Explain the criteria of a good index number.
11. a) Explain Link Relative Method with its merits and demerits
(OR)
b) Explain about seasonal components methods
12. a) Explain about various death rates
(OR)
b) Explain life tables and its construction.
13. a) Explain about Growth curves
(OR)
b) Explain fitting of growth curves by the method of three selected points and partial sums

Resolutions:

1. It is resolved to revise common Programme Structure and updating the course-wise syllabus in the prescribed format as per the guidelines issued by the APSCHE.
2. It is resolved to adopt regulations on scheme of examinations and marks/grading system of the university U.G. Programmes.
3. It is resolved to prepare model question paper for each paper in Prescribed format.
4. It is resolved to establish a separate Statistics Computer lab for doing Statistics Practicals with latest Software requirement.
5. It is resolved that the eligibility of the student for joining the course is Intermediate with Mathematics background.
6. It is resolved that the eligibility of the faculty for teaching the course is M.Sc Statistics.
7. It is resolved that the teacher/Paper setter/ Paper Evaluator should follow the specific guidelines given by the University.
8. List of Paper setters and Paper Evaluators were given with Phone numbers & Email ID's.
9. The Scheme of Model question Paper and Practica Question Paper was give under as follows.

Theory Examination Pattern:

Theory Examination Question Paper ----- 75 Marks

Section---A----- 50 Marks

Section –B----- 25 Marks

Section-A-----Each Unit Consists of 10 Marks with internal choice

Section-B----- Consists of 25 Marks out of which the questions must be framed from all units.

Scheme of Practical Examination:

Practical Examinations will be conducted at the end of Odd Semesters with internal examiners and the End of even Semesters by the external examiners.

Practical Examination : 50 Marks

1 out of 5 Practical Problems the student has to answer/solve 3 questions.

Each question problem carries 12 Marks ----- $12 \times 3 = 36$ Marks

Splitting of marks for each problem:

Aim---2 Marks

Method and Formulae ----- 4 Marks

Solution----- 5 Marks

Conclusion/Inference --1

Mark Maintenance &

Record-- 10 Marks Viva

----- 4 Marks

It is resolved to add faculty members to Statistics B.O.S. The following members may becopt to

help the preparation of above activity

1. Sri G. Moses

S.G. Lecturer

D.N.R.

College

Bhimavara

m

W.G.DT

2. Dr. D.V. Ramana Murthy

S.K.V.T. College

RAJAHMAHENDRAVARAM

3. Dr.

N. Madha

vi

Lecturer

in

Statistics

Govt College(A),

Rajahmundry East

Godavari Dt (AP)

4. Mr.

K.

Ashok

Lecturer

in

Statistics

P.R. Govt

College

(A)

Kakinada

a

E.G.DT

Signatures of the members:

1. Dr. D.V. Ramana Murthy

2. Dr. N. Madhavi

3. Sri G. Moses

4. Mr. K. Ashok

D. V. Ramana Murthy
Signature of the Chair Person/ Convener
