## Prof. M Jaganadha Rao

Vice Chancellor, Adikavi Nannaya University

Now a days during critical situations finding the matching blood group donor has become the critical issue. Due to this problem we came up with a simple and affordable solution which is our prestigious University blood donating website & mobile application. In which our university students are willing to donate their blood in any critical situation.

Through this website the user can easily find and contact their suitable blood group donor. Therefore, I would like to encourage our university students, if you are healthy and fit and weigh above 45 kilograms, aged from 17-60, you can give blood. People in good health who have never given blood, particularly young people, should begin to do so. While honoring all regular blood donors today, we also hope that young people may be encouraged to become regular blood donor. We hope that someday.

Thank you.

Due to the current situation in the country ,where it became difficult to find the donars ,we designed a website where our university students are willing to donate blood in any critical situation and at any time.

One blood donation can benefit many people. A single donation can help at least three people in need. Now a days blood donation programs and blood donation camps are hepd in many colleges and clubs.

Thank you.

### Dr. B Kezia Rani

NSS Co-ordinator, Adikavi Nannaya University

Many of us know that blood donors save lives every day through their blood donations. Every second, there may be a patient waiting for a blood transfusion to survive.

Normally a volunteer should be conscious to have an interval of 180 days between one donation and another. Blood donation is a noble gesture. It enhances the sense of pride in a person and it develops and altruistic attitude among the mankind.
