ABOUT NSS

GUEST OF HONOR

The NSS Cell of Adikavi Nannaya University comprises of 290 Units with over 29000 volunteers offering their services across East and West Godavari Districts. The NSS Cell represented the University in the Republic Day Parade of Republic Day Celebrations, 2020. The Cell has organized many service programs, blood donation camps and trained students to participate invarious activities like camps, youth festivals etc. Rehabilitation centers where formed for the corona effected people during the pandemic. The NSS Cell strives to render more community services in the future for the benefit of the poor, needy and marginalized sections of society.

CAMPAIGNER-EAT KIND INDIA
HUMANE SOCIETY INTERNATIONAL-INDIA

The COVID-19 pandemic is impacting all parts of human society. Like everyone else, conservation biologists are concerned first with how the pandemic will affect their families, friends, and people around the world. But we also have a duty to think about how it will impact the world's biodiversity and our ability to protect it. Biodiversity underpins current and future human health, well-being and economic prosperity. Yet it is being destroyed at an unprecedented and accelerating rate, with 25% of all plant and animal species now threatened with extinction. It is therefore critical that countries integrate biodiversity considerations into their COVID-19 response and economic recovery plans.
